**About the Just Energy Circle Energy Equity Forums**

JEC works to establish structures to ensure that energy opportunities are available to all, including low-income protections, fair prices, freedom from negative health impacts, and access to employment. JEC will host a series of energy equity forums throughout the five-county metropolitan Atlanta region to engage stakeholders on the subject of energy equity and why it matters to individuals and communities, particularly the underserved and underrepresented. Energy equity is the fair distribution of the benefits and burdens from energy production and consumption.

**About Partnership for Southern Equity (PSE)**

Partnership for Southern Equity (PSE) is a broad dynamic network of organizations and individuals committed to promoting equitable development and shared prosperity in the Atlanta metropolitan region. PSE envisions a new metropolitan Atlanta region in which all people can prosper and thrive because they have access to economic, civic, and social opportunities.
